

AIRCRAFT MAINTENANCE LICENCING (P66)

Streamlining Maintenance Licensing: Elevating Efficiency Through Digital Innovation

Serving Every Need

ERS's modernized, digital solution for the Certification of Aircraft Maintenance Engineers Licenses (AMEL) was developed in compliance with **Part 66** (P66) of the European Aviation Safety Agency (EASA) Regulation. This advanced registry solution offers centralization, enabling National Aviation Authorities to efficiently manage the application and issuance of licenses for aircraft maintenance personnel.

Our Technology Solution

P66 solution key features and benefits:

- Adheres to EU and national regulations for licensing and certifications through pre-defined workflows
- Promotes significant increases in efficiency and responsiveness through digitally streamlined applications and license privileges processes
- Facilitates a digital record of ongoing career development privileges to ensure license standards adhere to necessary regulations
- Monitors data trends to ensure effective regulation compliance

Our Features

Reporting

- Advanced reporting tools provide detailed analytics on application trends, processing times and compliance metrics enhancing operational efficiency and transparency

Support and Training

- Extensive support and training resources, including detailed tutorials, user guides, interactive webinars and a Customer Success team to assist with onboarding, go live and ongoing support
