

FLIGHT CREW LICENCING

Streamlining Personnel Licensing: Elevating Efficiency Through Digital Innovation

Serving Every Need

ERS's modernized, digital solution for the Certification of pilots, cabin crew and air traffic controllers was developed in compliance with *aircrew and air traffic controllers licencing and certification* of the European Aviation Safety Agency (EASA) Regulation. This advanced registry solution offers centralization, enabling National Aviation Authorities to efficiently manage the application and issuance of licenses for flight crew personnel and air traffic controllers.

Our Technology Solution

Flight Crew Licencing solution key features and benefits:

- Ensures compliance with regional, national and international regulations through pre-defined, efficient workflows for licensing and certifications
- Streamlines applications and license privileges processes, promoting faster responsiveness and reduced manual effort
- Maintains a digital record of flight crew qualifications and career development to uphold licensing standards
- Integrates medical assessments seamlessly, ensuring all regulatory requirements are met.
- Monitors data trends to support effective compliance and oversight
- Elevates efficiency and transparency through a fully digital and centralized platform

Our Features

Reporting

- Advanced reporting tools provide detailed analytics on application trends, processing times and compliance metrics enhancing operational efficiency and transparency

Support and Training

- Extensive support and training resources, including detailed tutorials, user guides, interactive webinars and a Customer Success team to assist with onboarding, go live and ongoing support
